

## EndNote and Project Muse

The Following directions will describe how to export references from Project Muse and import them into an EndNote library.

1. Perform a search in Project Muse.
2. For each record you would like to export, click on the box to the left of the citation. When you have finished marking a results page, click on *Save Marked Results*. This must be done for each page of results separately.

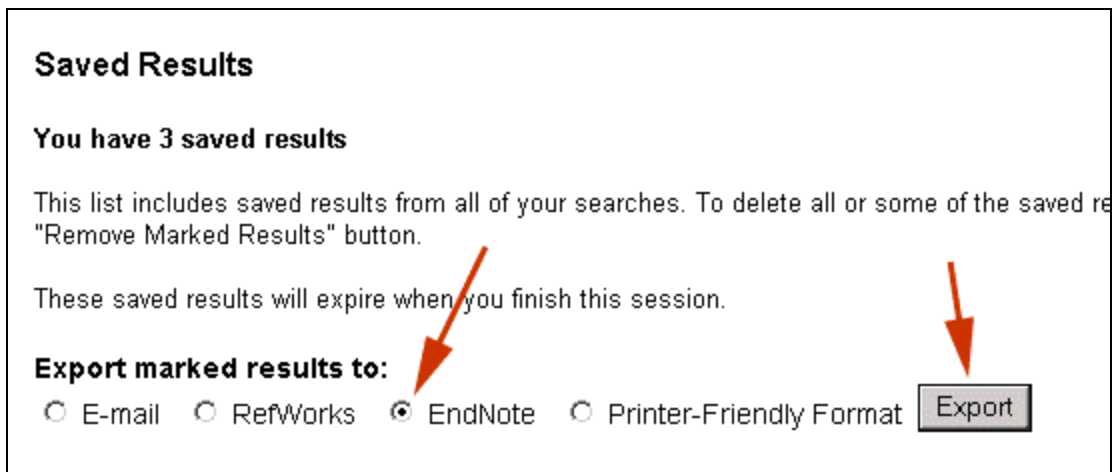

The screenshot shows the Project Muse search results interface. At the top, it displays 'Displaying: 1 to 10 of 4612 results' with a 'Relevance' dropdown menu, a '10' results per page dropdown, and a 'Re-Sort' button. Below this is a 'Search Within Results:' section with a 'Modify Search' link, an 'OR' operator, an empty search box, an 'All Fields (w/text)' dropdown, and a 'Refine' button. A 'Result Page:' navigation bar shows links for pages 1 through 7 and a 'Next >' link. A red arrow points to the 'Mark All / Clear All' checkbox, which is currently unchecked. Another red arrow points to the 'Save Marked Results' button. The first search result is for 'Fellmeth, Aaron Xavier' with the title '*Feminism and International Law: Theory, Methodology, and Substantive Reform* [View in PDF]'. The citation is 'Human Rights Quarterly - Volume 22, Number 3, August 2000, pp. 658-733 - Article'. Below the citation are the subjects: 'International law.', 'Feminism.', and 'Feminist jurisprudence.'. At the bottom of the result, it shows '(Search score: 1000)' and a link '[Show Occurrences in Context]'.

3. When you have finished marking records, click on the *E-Mail/Export Marked Results* link on the right-hand side near the top of the screen.

The screenshot shows the Project MUSE website interface. At the top, there is a navigation bar with links for JOURNALS, SUBSCRIBE, SEARCH, INFORMATION, WHAT'S NEW, and CONTACT. Below the navigation bar, the search criteria are displayed: "Searched for: women AND dialogue in All Fields w/Text". The results are shown as "Showing: 1 to 10 of 4612 results". There are dropdown menus for "Relevance" and "10", and a "Re-Sort" button. On the right side, there are two links: "E-mail/Export Saved Results" and "Search History". A red arrow points from the top right towards the "E-mail/Export Saved Results" link.

4. A list of marked citations will be displayed. At this point you can deselect any citations you do not wish to export. Select EndNote from the export options, and click on *Export*.

The screenshot shows the "Saved Results" section of the website. It states "You have 3 saved results". Below this, there is a paragraph explaining that the list includes saved results from all searches and that they will expire when the session ends. The "Export marked results to:" section has four radio button options: "E-mail", "RefWorks", "EndNote", and "Printer-Friendly Format". The "EndNote" option is selected. To the right of these options is an "Export" button. Two red arrows point to the "EndNote" radio button and the "Export" button.

5. EndNote will open and prompt you to select the library into which you wish to import records. Select the library, and the records will be imported into EndNote.
